

iOS VPNSVR Setup Guide

- 1- On your iOS device, navigate to Settings -> VPN and click on the Add VPN Configuration button.
- 2- Enter the following configuration:
 - a. Type: IKEv2
 - b. Description: give it any name you prefer. (i.e. VPNSVR-USA).
 - c. Server: usa1.vpnsvr.xyz
 - d. Remote ID: same as the Server field
 - e. Local ID: empty
 - f. User Authentication type: Username
 - g. Username: your VPNSVR username.
 - h. Password: your VPNSVR password.
 - i. Proxy settings - Off
- 3- Tap Done to finalize the setup.
- 4- Your newly created VPN configuration is now available. Tap on the switch button to connect or disconnect.
