

## macOS VPNSVR Setup Guide

- 1- In the dock click System Preferences.
- 2- In System Preferences click Network.
- 3- In Network click the + symbol on the bottom left.
- 4- Select Interface VPN.
- 5- Select VPN Type IKEv2.
- 6- Give this a Service Name to identify it by and click Create (i.e. VPNSVR-USA).
- 7- In Network fill in the Server Address: usa1.vpnsvr.xyz
- 8- The Remote ID should be the same as the Server Address.
- 9- Click Authentication Settings .... Select Username. Fill in your VPNSVR username and password.  
Click OK.
- 10- In Network click Apply.
- 11- To connect, in network click on the adaptor created above then click Connect.
